

Want To Reconfigure Your Mattress?  
Here's How!

TWIN XL

Your Reverie® Dream™ and Dream Supreme™ sleep systems are customizable on demand. If the firmness level you ordered is not ideal, then rearrange the DreamCell™ foam springs to quickly make your mattress softer or firmer – either the full mattress, either side or targeted areas like your lower back or shoulders. And remember, you don't need any new DreamCell™ foam springs to go from soft to firm (or vice versa).

### **Changing firmness levels on your Dream™ & Dream Supreme™ sleep system.**

- To access your DreamCell™ support system simply unzip your mattress and roll back the comfort layer.
- Use the following configuration grids (also on [reverie.com/configurations](http://reverie.com/configurations)).
  - To remove a DreamCell™ grasp the black fabric webbing around the DreamCell™ with one hand and with the other hand compress and gently pull out the DreamCell™.
  - To insert a DreamCell™ grasp the black webbing with one hand and compress and reinsert the DreamCell™ with the other hand.
  - When properly inserted, the center groove of the DreamCell™ should fit snugly in the black webbing – and be straight and aligned.
- Zip the mattress up and enjoy your custom firmness!

Be sure to view “How to Reconfigure a Reverie® DreamCell™ Mattress” video on [youtube.com/reverie](http://youtube.com/reverie).
