

Remote Control Features

LED SIGNATURE LIGHT

A. RAISE (+) HEAD SECTION
OF THE BASE

B. RAISE (+) FOOT SECTION
OF THE BASE

C. RETURN ALL SECTIONS
TO THE FLAT POSITION

D. LOWER (-) HEAD SECTION
OF THE BASE

E. LOWER (-) FOOT SECTION
OF THE BASE

Operating Instructions

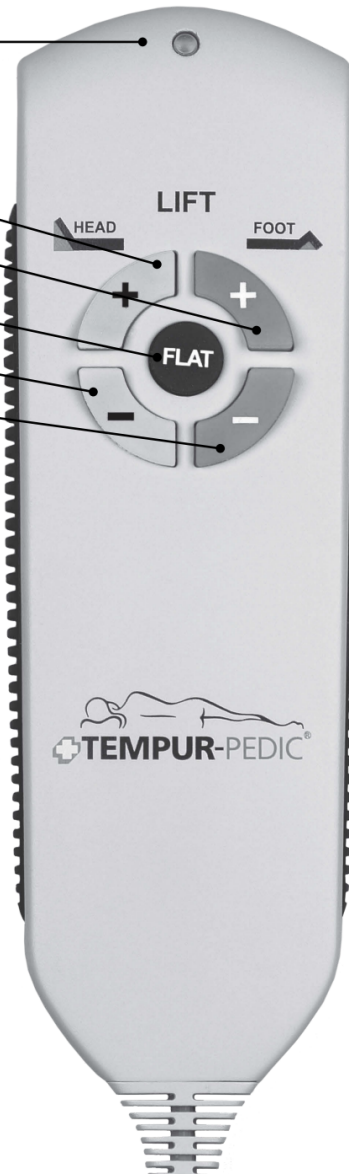

HEAD AND FOOT ADJUSTMENTS (A, B, D, E)

- Adjusts the Head and Foot sections to the desired positions. Press until the red LED Signature Light illuminates and desired position is achieved.

BED "FLAT" BUTTON (C)

- To level the Ergo System to the Flat position, press until the red LED Signature Light illuminates and the bed reaches the flat position.

NOTE: An unintentional touch to any button that does not illuminate the red LED Signature Light on the wired remote control will cause the keys to light up without performing the associated function. Press the appropriate wired remote control button until the red LED Signature Light illuminates to activate the desired function. This feature was installed to prevent any undesired movement should the wired remote control be dropped, etc.

Pairing The Hardwired Remote to 2 Bases

Pairing Instructions For Joining Two Bases

FOR 2 BASES TO OPERATE WITH 1 CONTROL

Assembling Split Dual Ergo Bases (Base A and Base B) to be used together as a single King or CA King system.

NOTE: the use of "Base A" and "Base B" is for description purposes only and the beds will not actually be labeled "Base A" or "Base B"

STEP 1

Cut the straps on the boxes of Base A and Base B.

STEP 2

Carefully remove the box covers on Base A and Base B.

STEP 3

Before the bases are removed from their boxes, cut the plastic strapping on each wired remote control and remove the control from the base frame.

STEP 4

Carefully unplug the control from Base A and Base B.

STEP 5

Remove the hardwired remote controls and set aside. Place the spare remote control in a safe place for any future use.

STEP 6

Remove and extend one of the provided Y-cables from the base frame.

STEP 7

Plug in the "A" output of the Y-Cable into Base A control port.

STEP 8

Plug in the "B" output of the Y-Cable into Base B control port.

STEP 9

Plug one of the provided hardwired remote controls into the "Control Input" side of the Y-Cable.

STEP 10

Route the control cable to your preferred side of the bed.
